FIXED PRICED SERVICE

OUTPATIENTS WELCOME

EXAMPLES OF CASES WHERE CT SCAN MAY BE INDICATED

- Elbow dysplasia & IOHC
- Orthopaedic assessment for angular limb deformities
- Tumour diagnosis & monitoring
- Assessment of inner ear disease & planning for TECA/LBO surgery
- Assessment of BOAS & planning for surgery
- Abdominal foreign body investigation
- Imaging of nasal chambers for chronic nasal discharge

WHAT IS A CT SCAN?

A computed tomography scan is a medical imaging technique used to obtain detailed internal images of the body.

Did you know?

CT scanning allows us to view detailed images inside your pet which is exceptionally useful when diagnosing and making treatment plans for soft tissue and orthopaedic diseases and injuries.

Why choose us?

- We are local and easily accessible from both the M20 & A20 motorways
- We provide a professional & reliable service
- Competitive prices
- All images are submitted to Vet-CT for specialist interpretation

CT = ALLOWS US TO VIEW A 3D IMAGE OF YOUR PETS BONES, ORGANS AND VESSELS.
